### Statistics & Reports - Immunization Coverage Levels

#### Trends in Immunizations

The immunization data is obtained through the annual Immunization Data Report. The Immunization Data Report is a self-report survey that each school is required to complete and submit to the Arizona Department of Health Services Immunization Office by November 15th each year per Arizona Administrative Code R9-6-707. It assesses the coverage and exemption data from the following grades: Child care/Preschool; Kindergarten; and 6th grade.

A JOURNAL SENTINEL WATCHDOG REPORT

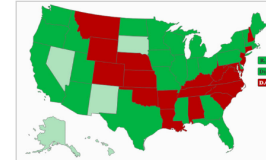

# Deadly Delays

The nation's newborn screening programs depend on speed and science to save babies from rare diseases. But thousands of hospitals fall short, deadly delays are ignored and failures are hidden from public view — while babies and their families suffer.

Published Nov. 16, 2013

*Because no one else will count*

## Delays at hospitals across country undermine newborn screening programs

Interactive: See how states compare and search for problem hospitals

Colton Hidde: Testing delay puts newborn's life in jeopardy

Lack of weekend lab hours adds to delay, putting babies at risk

*Because it  
sometimes really  
isn't a few bad  
apples*

*Because we  
want to report  
on what  
officials and  
institutions do,  
not what they  
say*

## THE DESPERATE AND THE DEAD

One by one, nearly all the state psychiatric hospitals were boarded up or bulldozed, but Massachusetts leaders broke their promise to replace them with something better — or much of anything at all. The failed mental health care system has led to a public safety crisis, including scores of murders by disturbed people, police shootings, and embattled institutions from courts to hospitals confronting a tidal wave of mentally ill people.

CALIFORNIA STATE AUDITOR | Report 2017-109  
May 2018 | 57

## SCOPE AND METHODOLOGY

The Joint Legislative Audit Committee (Audit Committee) directed the California State Auditor to conduct an audit of California's oversight of nursing facilities. During this audit, we were to examine the method by which the State sets Medi-Cal rates for nursing facilities and the degree to which the facilities' quality of care affects Medi-Cal payments. The Audit Committee also asked us to evaluate the use of related-party entities and transactions by nursing facilities, including those facilities owned by or related to Brius. The analysis that the Audit Committee approved contains 10 objectives. We list these objectives and the methods we used to address them in Table 13.

**Table 13**

## Retention Schedules

### General Retention Schedules

Any record series listed as permanent on a general retention schedule or that has been designated as historically significant should be transferred to the State Archives when the agency or political subdivision no longer wishes to maintain those records. You can reach the State Archives at 602-926-3720 or 800-228-4710 to discuss the transfer of the records.

[Permanent and Historical Records](#)

General Schedules supersede all existing custom schedules with the following exception: the custom schedule retention period is longer than the general schedule retention period.

[Fully Searchable PDF of ALL GENERAL RETENTION SCHEDULES](#)

[Click here to browse and search general retention schedules.](#)

(Counties, Education: K-12, Fire Districts, Higher Education, Municipalities, Special Districts and State Agencies, Boards and Commissions)

### State Agency Retention Schedules

[Click here to browse and search state agency retention schedules.](#)

### Court Retention Schedules

The following Retention Schedules are the responsibility of the State Supreme Court, and are provided here as a courtesy to our customers. All Judicial Bodies (Supreme Court, Superior Courts, Justice Courts, Municipal Courts, Adult Probation, Juvenile Probation, etc.) fall under the responsibility of the State Supreme Court, and are administered by the Administrative Office of the Courts (AOC). Retention Schedules for Judicial Bodies are created by the State Supreme Court, although the State Archives works closely with the State Supreme Court on these Schedules.

## California State Forms Directory

Under the leadership of the Government Operations Agency & the Governor, the state is undertaking an effort to streamline the number of forms it uses and find other efficiencies in forms management. This page provides citizens and employees of the State of California a common access point to state forms. Managed by the Department of General Services (DGS), the Directory contains links to electronic versions of relevant and current forms, providing citizens another resource to more easily conduct business with the State of California.

### Information:

For questions about a specific form, please contact the [forms coordinator](#) for the agency that authors that form. The DGS Forms Management Center (FMC) does its best to keep its links up-to-date. If, however, you encounter a dead or misdirected link or errors, please contact [FMC staff](#).

If you choose to save a form to your computer, the FMC offers [revision notification](#) for you.

## *Hospital Billing Varies Wildly, Government Data Shows*

By BARRY MEIER, JO CRAVEN McGINTY and JULIE CRESWELL MAY 8, 2013

A hospital in Livingston, N.J., charged \$70,712 on average to implant a pacemaker, while a hospital in nearby Rahway, N.J., charged \$101,945.

In Saint Augustine, Fla., one hospital typically billed nearly \$40,000 to remove a gallbladder using minimally invasive surgery, while one in Orange Park, Fla., charged \$91,000.

In one hospital in Dallas, the average bill for treating simple pneumonia was \$14,610, while another there charged over \$38,000.

Data being released for the first time by the government on Wednesday shows that hospitals charge Medicare wildly differing amounts — sometimes 10 to 20 times what Medicare typically reimburses — for the same procedure, raising questions about how hospitals determine prices and why they differ so widely.

# The Opioid Files

- From a lawsuit that tracked pain pills through 2012
- AP members can get access to a more user-friendly version
- WashPost data is downloadable, but be careful of definitions.

THE OPIOID FILES

## Drilling into the DEA's pain pill database

By The Washington Post Updated July 21, 2019

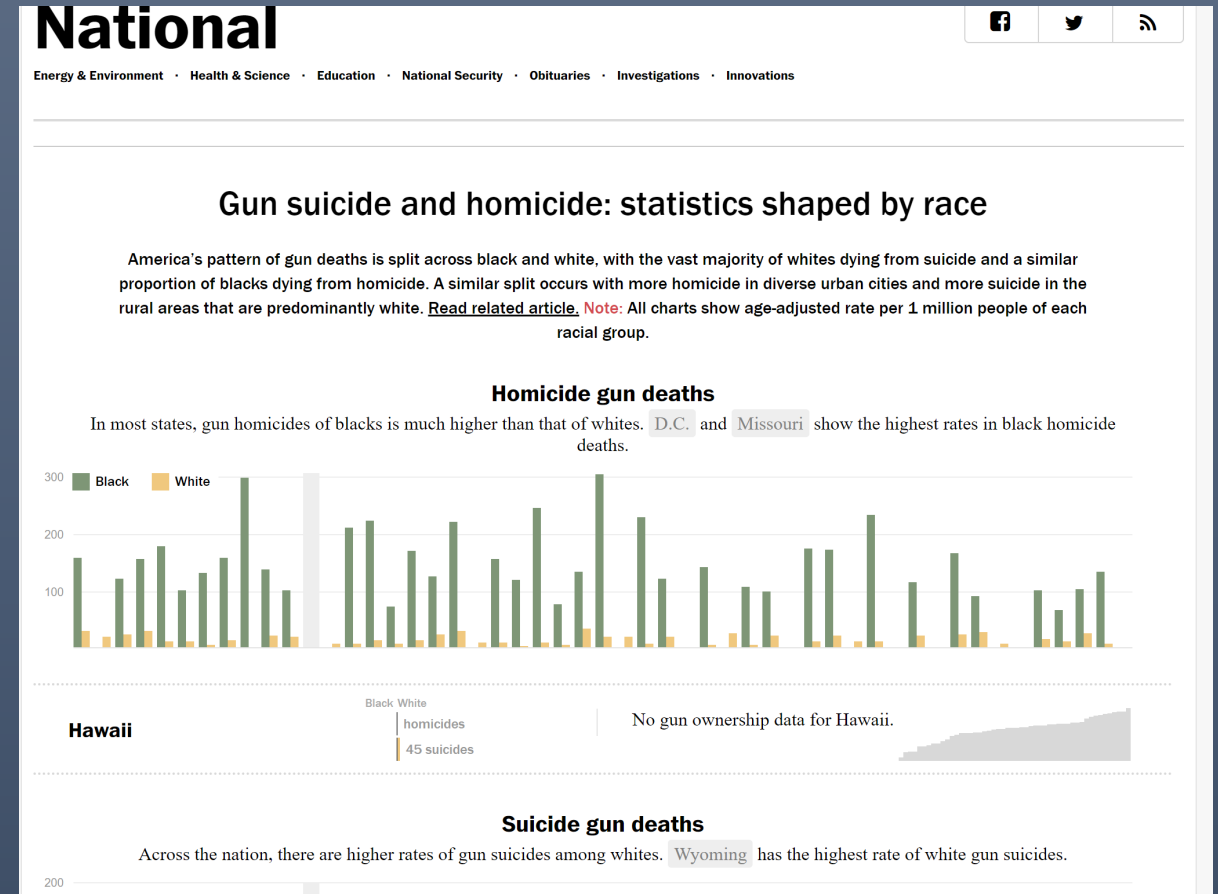

For the first time, a database maintained by the Drug Enforcement Administration that tracks the path of every single pain pill sold in the United States — by manufacturers and distributors to pharmacies in every town and city — has been made public.

The Washington Post sifted through nearly 380 million transactions from 2006 through 2012 that are detailed in the DEA's database and analyzed shipments of oxycodone and hydrocodone pills, which account for three-quarters of the total opioid pill shipments to pharmacies. The Post is making this data available at the county and state levels in order to help the public understand the impact of years of prescription pill shipments on their communities.

State data

*The wild West*

- Death certificates
  - Usually confidential, except with research agreement
- Hospital discharge data
  - Easier to get than you'd think
- Look for state initiatives
  - Opioid EMS calls
  - Vaccination records

The screenshot shows the Arizona Department of Health Services (ADHS) website. At the top, the ADHS logo and name are displayed, along with the tagline "Health and Wellness for All Arizonans". Below this is a navigation menu with links for HOME, AUDIENCES, TOPICS, DIVISIONS, and A-Z INDEX, and a Google Custom Search box. The main heading is "Hospital Discharge Data", with a breadcrumb trail: "ADHS Home / Public Health Preparedness / Public Health Statistics / Hospital Discharge Data - Home".

On the left side, there is a sidebar menu with the following items: Home (highlighted), Reporting Requirements, Data Release, Hospital & Patient Statistics, and Contact Us. Below the menu is a "Signup for email updates" button with an envelope icon.

The main content area is titled "Home" and features a red megaphone icon followed by a list of bullet points:
 

- Find searchable and comparative information on hospital care, quality, charges, and more using the **Hospital Compare** tool.
- **Be an Informed Consumer!** Take advantage of a variety of online, quickly and easily accessible information resources available to you.

Below the text are three featured content cards:
 

- Reporting Requirements:** Support for reporting hospitals. The card features an image of a hospital building with "EMERGENCY" signage.
- Data Release:** Information regarding data release. The card features an image of a woman smiling while looking at a laptop.
- Hospital & Patient Statistics:** Be an informed consumer. The card features an image of a hospital building.

# Thank you!
